Regulation Desk
Provides coverage on the content and implications of regulation, with particular focus on rules affecting risk transfer and risk management. Primary focus is centred on 'prudential regulation' and the rules designed to ensure safety and soundness, 'macro prudential regulation' and the avoidance and management of asset bubbles, and 'market regulation' and the rules that affect specific products, platforms or markets.

Commodities Desk
Provides coverage of risk management, derivatives and regulation as they apply to firms active in the energy and commodities markets. Risk management focuses on market risk and how firms manage/hedge their exposure. For derivatives we cover futures, options, swaps, OTC instruments and bespoke structured products tied to physical commodity prices, with regulation encompassing the regulatory framework around the trading of energy and commodity derivatives.
